

# HIP & Legacy Middleboxes

draft-irtf-hiprg-nat-00

Martin Stiemerling, Jürgen Quittek and Lars Eggert  
NEC

IETF-64, Vancouver, Canada

November 11, 2005

# History

- talks about how HIP interacts with legacy (i.e., HIP-agnostic) middleboxes
  - base exchange & data traffic
  - IPv4 & IPv6
- Talks about extensions to middleboxes for HIP traversal
- pure problem statement

# What Now?

- accepted as RG item in Paris
- resubmitted as draft-irtf, no content changes
- authors believe this is ready for publication
- timing is good: WG getting ready to work on middlebox traversal
